VibeRMS

Vibration Meter and Machine Certification App
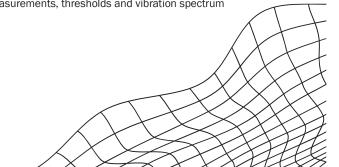

Produce Detailed Reports for Any Machine Type

Description:

VibeRMS is a vibration meter app with machine certification features. Unique to VibeRMS is the build your own machine mode; which allows creation of an entire library of custom machines with custom names and measuring points. VibeRMS is a truly custom app; capable of providing detailed reports for any machine type.

Features:

- Build machine from library or take picture of machine and add the measuring points
- Select machine to measure from VibeRMS library, standard library or users custom library
- Measure Vibration Velocity in ips or mm/s
- Measure Vibration Acceleration in G's
- Measure Filtered Vibration Displacement in mils p-p
- View Velocity/Acceleration Spectrum
- Enter machine information and photo
- Select Threshold from different Standards or set it to custom values
- Generate complete Report with machine information, company logo, measurements, thresholds and vibration spectrum
- Send Report by email or save it to the iPad
- Report manager to view saved reports
